Navi Mumbai, Maharashtra, India

AREA OF EXPOSURE AND STRENGTH

- **Data Auditing & Quality Control:** Auditing raw datasets, identifying discrepancy trends, handling missing values, and validating data integrity using Python and MS Excel.
- **Business Intelligence & Dashboards:** Designing interactive Power BI and Tableau dashboards using dynamic charts, Power Query transformations, and DAX calculations.
- **SQL Querying & Reporting Automation:** Writing SQL queries (JOINS, GROUP BY, subqueries) and automating reporting workflows via Excel VBA and Python, cutting manual turnaround by over 80%.
- **Statistical Analysis & Predictive Modeling:** Applying descriptive statistics, hypothesis testing, and EDA, and building classification/regression models (Scikit-learn) for risk scoring and demand forecasting.

PROFESSIONAL EXPERIENCE

Electrolab

Aug 2026 – Present

Data Analyst Apprentice | Mahape, Navi Mumbai, India

- **Data Reconciliation & Migration:** Architected an idempotent, checkpoint-based Python pipeline reconciling 34,839 ERPNext Item records against a 13,679-row Excel source, resolving 787 supplier entities at 100% match accuracy with 0 failures across a 200-item production pilot.
- **Data Integrity Auditing:** Diagnosed byte-level Item Code mismatches caused by hidden non-breaking-space characters and enforced strict raw-match validation logic, preventing silent record corruption ahead of a ~19K-row full rollout.
- **Requirements Gathering & API Analytics:** Led requirements gathering and data cleaning for the full-scale migration; separately extracted customer credit-rate records via REST API and produced descriptive statistics/box-plot analysis to surface distribution outliers.

Anvex AI Technologies Solutions Pvt. Ltd.

Mar 2026 – Jun 2026

Business Analyst Intern | Kandivali, Mumbai, India

- **Data Quality Management:** Audited 8,000+ ANPR/Vision AI records; built a Python/Excel pipeline flagging an 18.5% discrepancy rate.
- **Reporting Automation:** Applied AI-assisted logic to a legacy VBA workflow, cutting turnaround 120 to 15 min (87.5%), saving ~7 hrs/cycle.
- **SQL & Data Extraction:** Wrote and optimized SQL queries (joins, aggregations, DDL/DML) for campaign/call-log extraction, 3,000+ records/cycle.
- **Stakeholder Support:** Delivered weekly ad-hoc reports and reliability summaries supporting client onboarding and operations.

YBI Foundation

Jul 2025 – Dec 2025

Machine Learning Intern | Remote

- **Predictive Modeling:** Built classification/regression pipelines in Python (Scikit-learn), tuning hyperparameters to reach 90–92% accuracy.
- **Exploratory Data Analysis:** Analyzed datasets using Pandas/Seaborn across 15+ variables, uncovering correlations that informed model design.
- **Data Preprocessing:** Optimized preprocessing (encoding, missing values, class imbalance) across 4+ datasets, cutting cleaning time 20%.

EDUCATION

M.Sc. Data Science

Jun 2024 – Apr 2026

B. N. Bandodkar College, Mumbai University, Thane

- CGPA: 8.57 | Ranked 1st in Semesters 1 & 4
- Coursework: Statistical Analysis, Machine Learning, Deep Learning, NLP, Data Engineering, Predictive Analytics

B.Sc. Information Technology

Jun 2021 – Apr 2024

SIES College, Mumbai University, Navi Mumbai

- CGPA: 8.72 | Coursework: DBMS, Networking, Operating Systems, Web Technologies, Software Engineering

PROFESSIONAL PROJECTS

Title: Insurance Analytics Dashboard

Feb 2026 – Mar 2026

Tools: Power BI, Tableau, MS Excel

- Processed \$600M+ in policy coverage and \$16.9M in claims across 10,000 records; Power BI dashboards cut analysis time 30%.

Title: CricGenAI — M.Sc. Research Project

Jan 2026 – Mar 2026

Tools: LangChain, LLaMA 3.3 70B, SQLite, Streamlit, Python

- Engineered a multilingual (English, Hindi, Marathi) NL-to-SQL system using LangChain agents via an interactive Streamlit app.

Title: Supply Chain Optimization Dashboard

Jan 2026 – Feb 2026

Tools: Power BI, SQL, DAX

- Analyzed inventory data via SQL/DAX/Power Query, surfacing demand gaps (151 vs. 76 units), a \$61K shortfall, and a \$301K profit opportunity.

Title: Loan Default Prediction Tool

Dec 2025 – Jan 2026

Tools: Python, Scikit-learn, Streamlit, Power BI

- Built a predictive pipeline on 255,387 records; Random Forest achieved ~90% accuracy, deployed via Streamlit with a Power BI dashboard.

CERTIFICATIONS

- Data Analyst Bootcamp — KrishaI Technologies (2026) • AIML Internship — YBI Foundation (2025) • Python — freeCodeCamp (2025)

SKILLS

- **Programming & Databases:** Python, SQL, JavaScript (Basic), HTML/CSS, MS SQL Server, MySQL, SQLite
- **Data Analytics & BI:** Pandas, NumPy, Power BI (DAX, Power Query), Tableau, Excel (VBA Macros, Pivot Tables)
- **Cloud, ML & Tools:** AWS, GCP BigQuery, Azure, Snowflake, Git/GitHub, Scikit-learn, Predictive Modeling
- **Soft Skills:** Data Storytelling, Stakeholder Management, Cross-functional Collaboration
